

New!

## Cold Collection: Deli Containers

Versatile Packaging with Ready-to-eat Appeal

# Versatile for Cold and Hot Foods

## Easy Prep and Handling

Nesting containers reduce storage space. Easy-close lids and positive stacking streamline volume preparation, merchandising and simplify handling.

## Versatile Container Sizes and Lids

Popular container sizes in 8-32 oz., with a matching universal lid, meet every packaging need while reducing SKUs and storage space.

## Crack-Resistant, Durable Material

Polypropylene (PP) is ideal for hot or cold applications, reusable, dishwasher safe (top shelf) and designed for microwaving and freezing.

## Sturdy, Secure Lid Design

Sturdy, secure lids provide the highest level of leak-free performance throughout the cycling of packing, merchandising, purchasing and transporting.

## Sales-Building Advantages:

- **Three Lid Style Options:** Choose from overcap lid, injection lid and a leak-resistant lid that is ideal for soups.
- **Premium Stackable Design:** These containers showcase food, yet they're rigid enough for stacking.
- **One Line for Both Hot and Cold Items:** Great for cold foods, yet heavy enough for hot deli selections.

# Product Specifications
